

Arthur Elstone became a director of No1 CopperPot in 2006 when he was the Payroll Manager for GMP. As a member of Police Staff, Arthur believes he brings a different perspective to the board of directors. He is skilled in several areas of HR & Employment Law, Payroll & Payroll Legislation and he has a good background in Finance.

Arthur has been involved via payroll with the credit union since 1998 and has always worked closely with the team to improve the speed and accuracy of the information we share. He became a member of the credit union fairly soon after joining GMP as he felt it was a great way to save and/or borrow money especially with the deduction coming directly from his salary.

Arthur believes the strength of No1 CopperPot comes from the family bond as we all benefit in some way from the Credit Union collectively, whether this is by the dividend we receive or the competitive interest rates on loans and good insurance policies included.

Arthur left GMP in August 2007 to become the Payroll Manager of Greater Manchester Fire & Rescue Service and was pleased to find out that he could carry on working as a director for No1 CopperPot. He will continue to work with fellow directors and the staff to provide the best service and most suitable products that benefit of all our members.

Arthur is married with two children (one of each) and his hobbies include DIY, Football (watching these days), all aspects of Computing, Golf, and spending quality time with his family.
